System Requirement

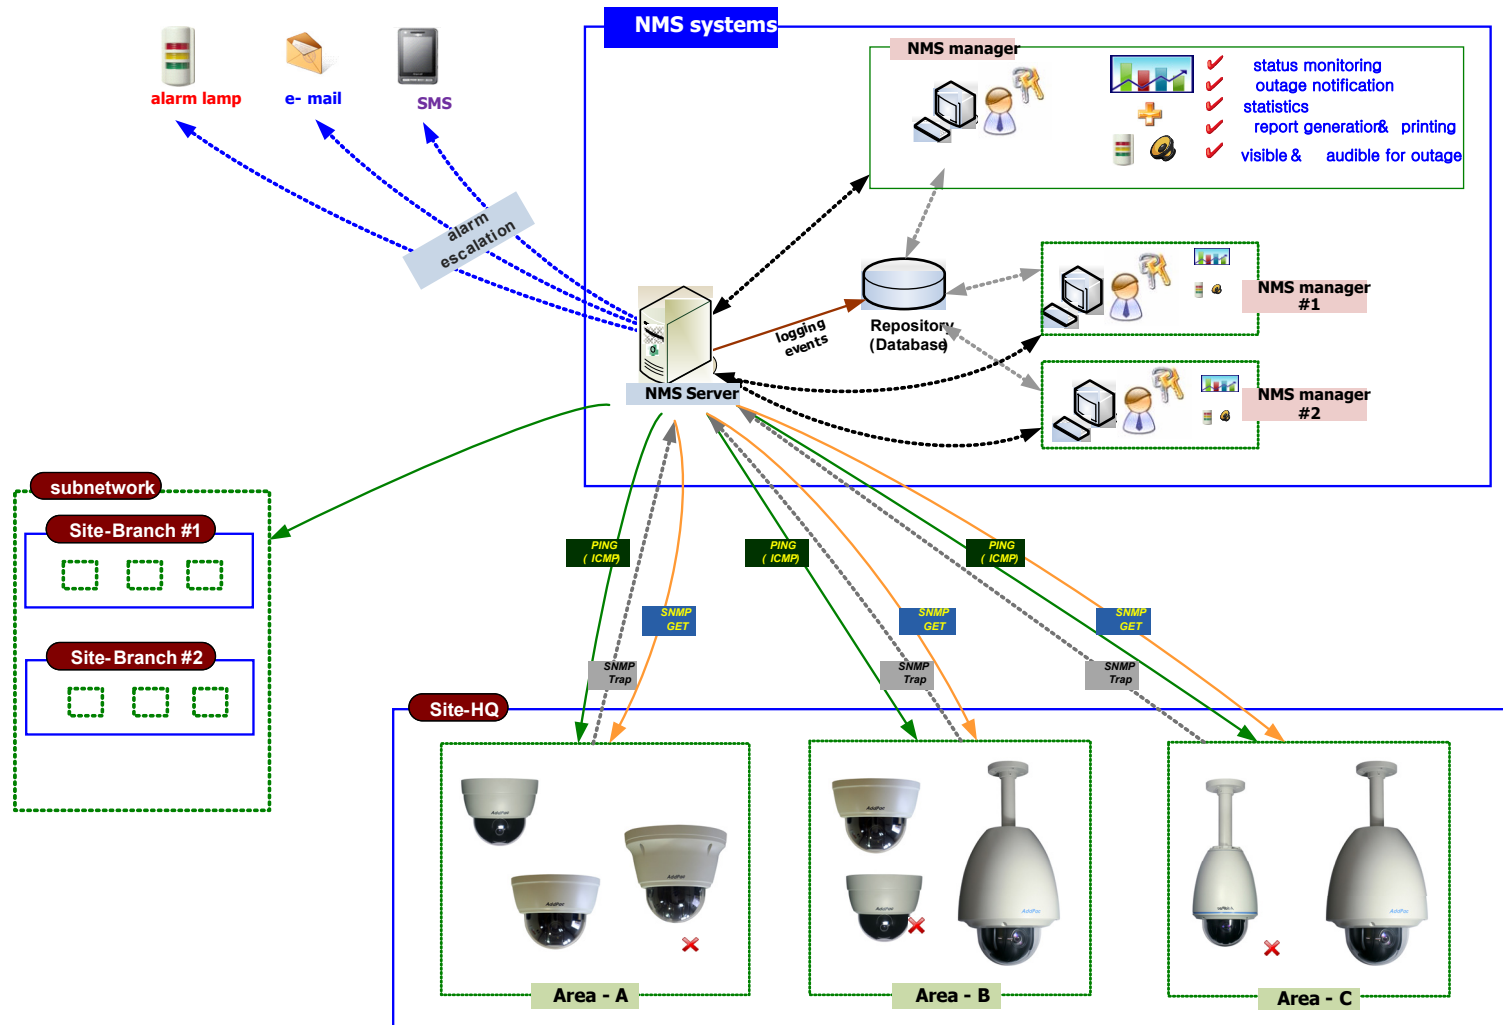

NMS Server

- OS : RHEL (Redhat Enterprise Linux) 5.0 or higher
- CPU : Quad-Core 2.0 GHz / 1333MHz FSB 2x4 MB cache
- Physical Memory : 4 GB
- HDD : 300 G
- JRE (Java Runtime Environment) 1.5.1 or Higher
- Database : PostgreSQL 8.1.11

NMS Client

- Windows XP, Vista, Windows Server 2000/2003
- Microsoft Internet Explorer 6.0 or higher

NMS Networking Diagram

Web-based Management

- **Easy Access via Web browser**
 - Microsoft Internet Explorer 6.0 or higher compatible
- **Version Control**
 - Automatic version check
 - New version software download feature
- **UI control**
 - User friendly GUI management

Version Control

The screenshot displays the IPNext Web-Based Management interface within a Windows Internet Explorer browser window. The browser's address bar shows the URL `http://172.16.31.20/`. The main content area features a dark blue background with a world map and a person using a laptop, with the text "AddPac Technology Smart Network Management System" and a copyright notice "© AddPac Technology, all rights reserved".

Two yellow callout boxes highlight specific features:

- Automatic version check:** A yellow box with an arrow pointing to the top right of the main interface.
- New S/W version update:** A yellow box with an arrow pointing to the bottom right of the main interface.

Two Windows-style dialog boxes are overlaid on the interface:

- Launching Application:** A dialog box with a blue title bar and a close button. It contains a progress bar and the text "Verifying application requirements. This may take a few moments." Below the progress bar are icons of a computer and a globe.
- (61%) Downloading installnms:** A dialog box with a blue title bar and standard window controls. It contains the text "Downloading installnms" and "This may take several minutes. You can use your computer to do other tasks during the installation." Below this is a progress bar showing 61% completion. The details include: "Name: installnms", "From: 172.16.31.20", and "Downloading: 6.29 MB of 10.1 MB". A "Cancel" button is at the bottom right.

Web-based Login

Network Resource Management

- Network resource management with hierarchical structure
- Role-based resource management for each administrator

The screenshot displays the AddPac Network Resource Management interface. On the left, a hierarchical tree structure shows the organization of network resources, including sites like 'AddPac' and 'Seoul', and various sub-networks and branches. A context menu is open over the 'GangNamGu' node, with 'Execute SMM' highlighted. An orange callout box points to this menu with the text: 'can cooperate with the application executables such as SMM'. In the center, a table lists device categories with their descriptions. An orange callout box points to this table with the text: 'manage the complex network with a structured, hierarchical form'. On the right, a 'User Properties' dialog box is open, showing a 'Site' tab with a tree view of the same hierarchical structure. An orange callout box points to this dialog with the text: 'can assign the hierarchical node to the operator and manage role-based policy'. At the bottom, a status bar shows 'Total Categories : 6'.

Device Fault Management

The screenshot displays the Smart Network Management System (NMS) interface. The main area shows a grid of device status cards for various devices like DVR Servers, SNR Servers, and Cameras. Each card displays the device name, IP address, and service status. A tooltip for 'NMS_Camera #4' shows details like Model (AP-IPC250M), IP Address (172.16.31.16), and Severity (Major). A message log at the bottom lists events such as 'device 00_RBT_server's all services are down' and 'interface 172.16.4.180 (172.16.4.180) device(NMS Camera) service SNMP failed at 2009-4-10 5:51:06 PM'.

device status matrix with several severity such as critical, major, minor

* severity color

- 1) red : critical
- 2) orange : major
- 3) light blue : normal

display message icon when the device have a notification for event

Device Fault Management

The screenshot displays the Smart Network Management System (NMS) interface within a Windows Internet Explorer browser. The main content area is titled "Device Monitoring - cAll" and shows a "device status matrix with small view mode". This matrix consists of a grid of icons representing various network devices, each with a status indicator (green for online, red for offline, yellow for warning). A red arrow points to a specific device in the matrix, labeled "NMS_Came".

On the left side, there is a tree view showing the hierarchy of devices under "Current Outage Devices (18)". The tree includes categories like "AddPac", "Branch AQ", "Branch GX", "Branch KT", "HeadQuarter", and "Subnetwork #2". Each device in the tree has a "Service..." column and an "Availability" column.

At the bottom of the interface, there is a section titled "Your Outstanding Notices (7)". This section contains a table with the following columns: Ack, ID, Send Time, Site, Device Name, IP Address, Service, and Message.

Ack	ID	Send Time	Site	Device Name	IP Address	Service	Message
<input type="checkbox"/>	9535	4/10/2009 9:26:04 PM	/AddPac/Branch GX	Camera #4			device 00_RBT_server's all services are down.
<input type="checkbox"/>	9528	4/10/2009 5:51:06 PM	/AddPac/Branch AQ	NMS Camera	172.16.4.180	SNMP	interface 172.16.4.180 (172.16.4.180) device(NMS Camera) service SNMP failed at 2009-4-10 5:51:06 PM

<input type="checkbox"/>	9494	4/10/2009 11:37:12 AM	/AddPac/Branch GX	Center Camera #4	172.17.113.40	Call Manager	interface 172.17.113.40 (172.17.113.40) device (IPNext 3000 Master) service Call Manager 2009-4-10 11:37:12 failed
<input type="checkbox"/>	9396	4/9/2009 10:57:37 AM	/AddPac/Branch AQ	NMS_Camera #3			device NMS_IP_PBX_31.13 all services down.

The bottom status bar shows the current date and time as 6/17/2009 4:42:56 PM, the IP address 172.16.31.20:5101, the user admin, and the version 1.2.3449.

Device Fault History Management

- Provide both summary view and detailed event message
- Can Write troubleshooting job note for each event manually
- Administrator can query for a history fault with search condition
- Each fault is related to the several raw events

Device Fault History Management

daily fault event summary statistics information

detail fault event history list up with filter condition (advanced search)

The screenshot displays the Smart Network Management System (NMS) interface. At the top, there is a navigation menu with options like NMS, Account, Configuration, Monitoring, Notification, Fault, Statistics, View, and Help. Below this, there are several tabs: Site, Notification Summary, Service Outages, Device Monitoring, Device Group, Device Category, and Device Model. The 'Notification Summary' tab is active, showing a table with columns for Date/Time, Outstanding, and Acknowledge. Below this, the main 'Notification' table is visible, listing various fault events with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, Message, and Respond Time. An 'Advanced Search' dialog box is open, allowing users to filter results based on Sub Network, Site, IP Address, Notice Status Type, Message Contains, and Sort By options. The status bar at the bottom shows the current time, IP address, user name, and version number.

Device Event History

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a list of events with columns for Event Time, Outsta..., Ackno..., Not Clea..., Cleared, and In Pr... Below this is a detailed view of event notifications, including fields for Ack, ID, Severity, Event Time, Site, Device Name, IP Address, Service, and Message. An orange callout box points to the search bar and says "Can view all events for devices with search condition". Another orange callout box points to the summary table and says "summarize daily event statistics data".

Device Status Information

Notification Management

- Notify administrator for important event such as critical device fault when proper action needs
- Provide several notification channel such as SMS, e-mail, alarm lamp
- Notification channel configuration for each event
- Manage notification with device category such as Server, Terminal, PC, etc
- Provide Alarm with audible (play sound), visible (alarm lamp) form

Event Notification Management

apply notification policy with event-based filter
(example : notify me when network link of device is down through SMS, e-mail)

specify category when each event occurs

describe notification message content for e-mail or SMS

Event Notification Properties

Notification Name: serviceUnresponsive

Description: test

Event: Node event: serviceUnresponsive

Destination Path: default

Notification Type: sms, alarmLamp, email

Current Rule: IPADDR IPLIKE ****

Apply Category: Desktop, Network Camera, Phone, Server, Switch

Email Subject: Notice #noticeid% %service% service on %interfaceresolve% (%interface%)

Text Message: The %service% poll to interface %interfaceresolve% (%interface%) on node %nodeLabel% successfully completed a connection to the service listener on the remote machine. However, the synthetic transaction failed to complete within %param[timeout]% milliseconds, over %param[attempts]% attempts. This event will NOT impact service level agreements, but may be an indicator of other problems on that node.

Special Values: Can be used in both the text message and email subject

%noticeid% = notification ID number

%time% = time sent

%severity% = event severity

%nodeLabel% = may be IP address or empty

%interface% = IP address, may be empty

%service% = service name, may be empty

%eventid% = event ID, may be empty

Note: If the alert exceeds 80 bytes then the notification will be dispatched in two or more sms.

Enable Notification

Event Notification Management

The screenshot shows the Smart Network Management System (NMS) interface. The main window displays a tree view of network devices and their service availability. A dialog box titled "Destination Path Properties" is open, showing configuration options for a destination path named "default".

Destination Path Properties Dialog:

- Destination Path Name: default
- Initial Target: (empty)
- Initial Delay: 0m
- Notification Table:

Notification Type	Target	Auto Notify
alarmLamp	alarmLamp	on
email	admin	on
sms	admin	on
- Escalation: (empty)
- Delay: 0m

A red callout box with the text "define notification channel such as e-mail, sms, or alarmLamp" points to the "alarmLamp" entry in the notification table.

Configuration

The screenshot displays the Smart Network Management System (NMS) configuration interface. The main window shows a tree view of devices and a 'Configure Notification' dialog box. The dialog box is set to 'E-Mail' notification and has fields for 'Sender Email Address' (nms@addpac.com) and 'SMTP Server Host' (61.33.161.2). An orange callout box with an arrow points to the dialog box, containing the text 'global notification channel configuration'.

Fault Statistics

- analyze for a fault event with graph and detailed list data
- Report form generation and print out for statistics result

Fault Statistics

The screenshot displays the Smart Network Management System (NMS) interface. The main content area is divided into several sections:

- Event Summary Table:** A table on the left showing event statistics for various dates from 2009-04-04 to 2009-04-13. Columns include Event Time, Outsta..., Ackno..., Not Clea..., and Cleared. A callout box points to this table with the text: "display graph for fault statistics with various search condition".
- Search Condition Panel:** A panel above the graph allowing users to filter data by "Hour" (set to 4/ 9/2009) and "Site" (set to Branch A, Branch AQ, B).
- Fault Statistics (Site) Graph:** A bar chart showing fault counts over time for different sites. A callout box points to this graph with the text: "display detailed data for fault statistics".
- Detailed Data Table (4/9/2009):** A table showing fault counts for each hour of the day, broken down by site. The total fault count for the day is 118.
- Your Outstanding Notices (18):** A list of system alerts at the bottom, including messages about server downtime and network issues.

Fault Statistics – Report Generation

report generation for fault statistics and print out the result

Model & Service Management

- Define new model with provided template image & properties
- Customize data collection with standard protocol such as TCP, SNMP

Device Model Management

manage device model with various properties such as model image

model image repository for selection

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of sites on the left, a list of device models in the center, and a 'Device Model Properties' dialog box open over the list. The dialog box has tabs for 'General', 'Service Availability', 'System Monitoring', and 'Service Monitoring'. The 'General' tab is active, showing fields for 'Model Name' (AP-IPC250M) and 'Category' (Network Camera). There is a checkbox for 'Management by SSCP' and a field for 'SSCP Port' (5061). A 'Model Image' field contains a small image of a camera. Below the main window, a 'Model Image Management' window is open, showing a grid of various device icons for selection. An orange callout box points to this window. At the bottom, there is a table of 'Your Outstanding Notices (18)' with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, and Message.

Ack	ID	Send Time	Site	Device Name	IP Address	Service	Message

Service Definition

define the service for data collection, current status with standard protocol such as TCP or SNMP

The screenshot displays the Smart Network Management System (NMS) interface in Internet Explorer. The main window shows a tree view of sites and a table of services. A 'Service Properties' dialog box is open, showing the configuration for a service named 'Camera Operation Status' using the SNMP protocol on port 161. The dialog includes fields for Service Name, Protocol, Port, Interval (30000 msec), Timeout (3000 msec), and Retry (3). A second 'Service Properties' dialog box is also visible, showing the 'Service Condition' section with an operator set to '=' and an operand set to '1'. At the bottom, a table of 'Your Outstanding Notices (18)' is visible, listing various events such as '00_RBT_server', '5th floor meeting...', and 'NMS Camera 2' with their respective IP addresses and services.

Site	Name	Description	Service Name	Protocol	Port
