# System Requirement

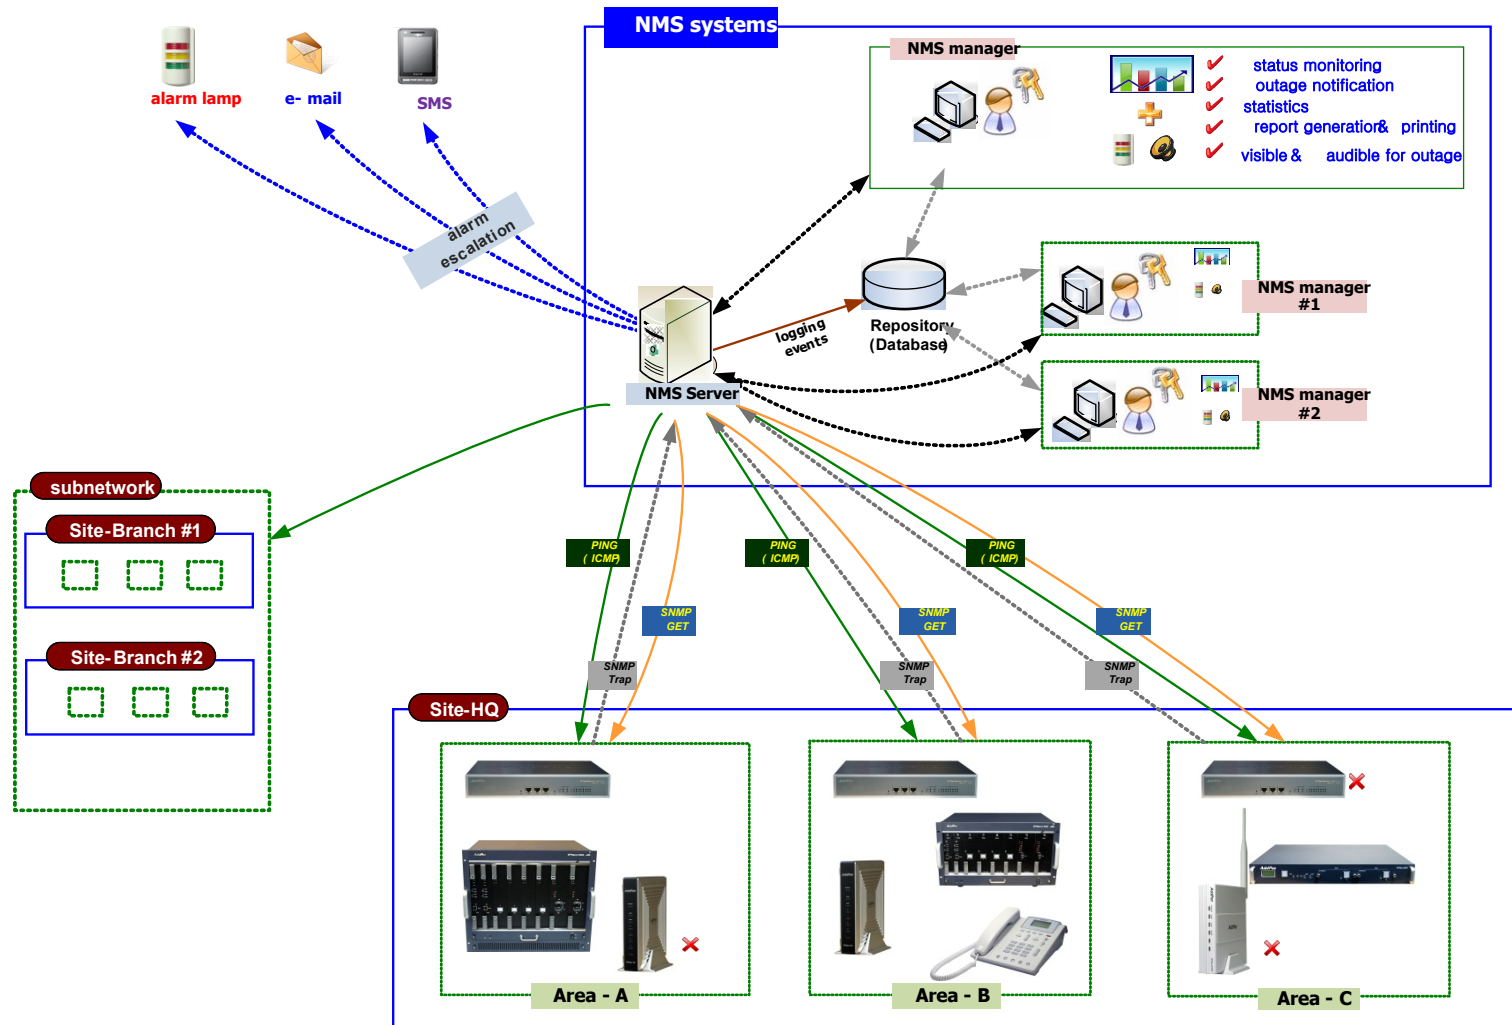

## **NMS Server**

- OS : RHEL (Redhat Enterprise Linux) 5.0 or higher
- CPU : Quad-Core 2.0 GHz / 1333MHz FSB 2x4 MB cache
- Physical Memory : 4 GB
- HDD : 300 G
- JRE (Java Runtime Environment) 1.5.1 or Higher
- Database : PostgreSQL 8.1.11

## **NMS Client**

- Windows XP, Vista, Windows Server 2000/2003
- Microsoft Internet Explorer 6.0 or higher

# NMS Networking Diagram

# Web-based Management

- **Easy Access via Web browser**
  - Microsoft Internet Explorer 6.0 or higher compatible
- **Version Control**
  - Automatic version check
  - New version software download feature
- **UI control**
  - User friendly GUI management

# Version Control

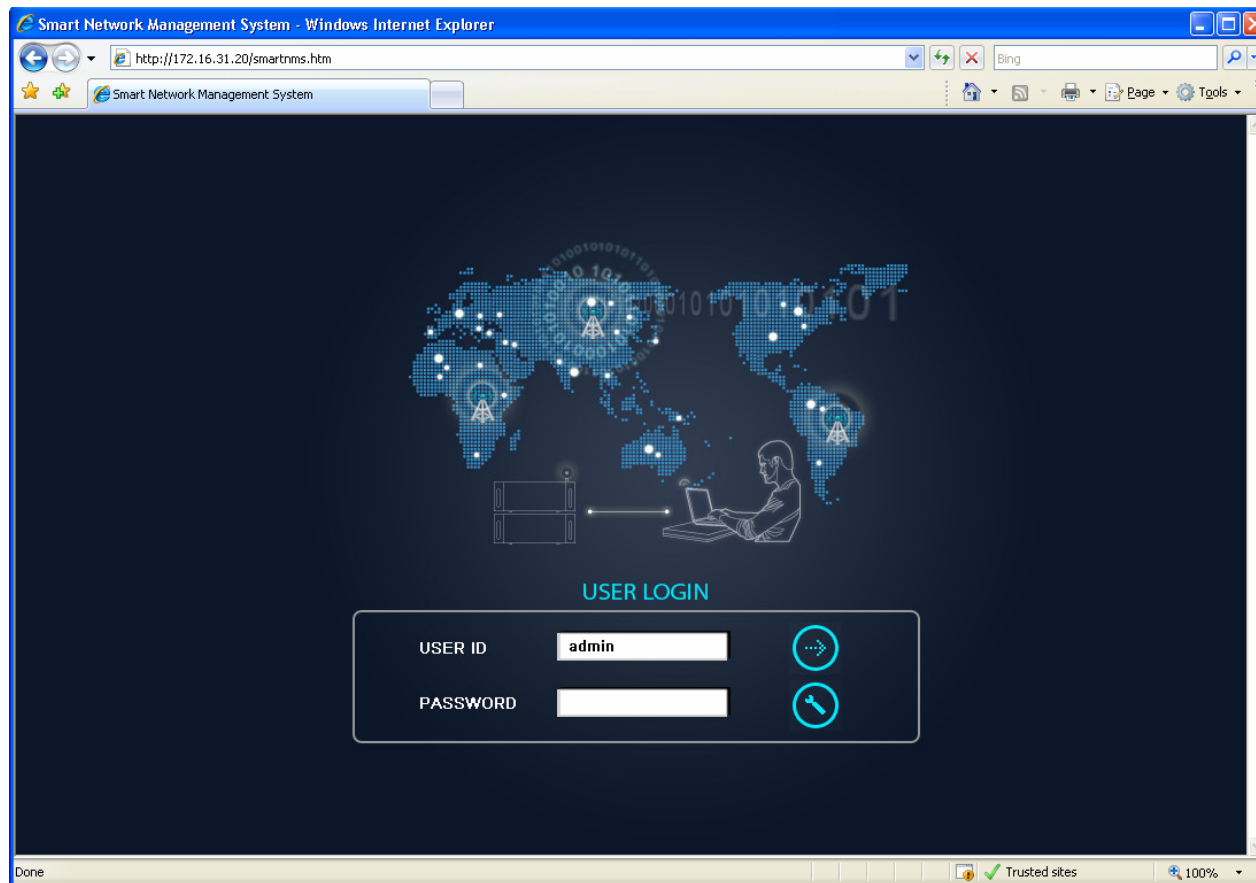

The screenshot displays a Windows Internet Explorer browser window titled "Smart Network Management System - Windows Internet Explorer" with the address bar showing "http://172.16.31.20/". The main content area features a dark blue background with a world map, server racks, and a person at a laptop. The text "AddPac Technology Network Management System for GSM" is prominently displayed. Two dialog boxes are overlaid on the browser window:

- Launching Application:** A blue dialog box with a close button. It contains a progress bar and the text: "Verifying application requirements. This may take a few moments."
- (61%) Downloading installnms:** A blue dialog box with a close button. It contains a progress bar and the text: "Downloading installnms. This may take several minutes. You can use your computer to do other tasks during the installation." Below the progress bar, it shows: "Name: installnms", "From: 172.16.31.20", and "Downloading: 6.29 MB of 10.1 MB". A "Cancel" button is at the bottom.

Two yellow callout boxes with arrows point to specific elements:

- Automatic version check:** Points to the "Launching Application" dialog box.
- New S/W version update:** Points to the status bar at the bottom of the browser window, which shows "Done" and "Trusted sites".

# Web-based Login

# Network Resource Management

- Network resource management with hierarchical structure
- Role-based resource management for each administrator

The screenshot displays the AddPac Network Resource Management interface. On the left, a hierarchical tree structure shows the organization of network resources, including sites like 'AddPac' and 'Seoul', and various sub-networks and branches. A context menu is open over the tree, with 'Execute SMM' highlighted. In the center, a table lists device categories such as Desktop, Network Camera, Phone, Server, Switch, and VoIP Gateway. On the right, a 'User Properties' dialog box is open, showing a selection of site nodes for assignment to a user.

**manage the complex network with a structured, hierarchical form**

**can assign the hierarchical node to the operator and manage role-based policy**

**can cooperate with the application executables such as SMM**

# Device Fault Management

- Centralized fault summary information in main window
- Display current fault device through tree view
- Notify administrator with detailed fault information
- Provide device availability information for 24hrs

# Device Fault Management

**main window**

**current device fault list with hierarchy view**

**current device fault event message are shown as below**

**site device fault summary**

**overall total device fault statistics**

**device fault summary for category (classification)**

# Device Fault Management

The screenshot displays the Smart NMS interface in a Windows Internet Explorer browser window. The main content area shows a 'Device Monitoring' view with a grid of device status icons. A red box highlights the grid, and a red arrow points to it with the text 'device status matrix with small view mode'. The grid contains various device icons, some with red 'X' marks indicating faults. Below the grid, a table lists 'Your Outstanding Notices (18)'.

Can view all events for devices with search condition

summarize daily event statistics data

# Device Status Information

- System Performance Information (CPU, HDD, Memory,...)
- Provide device current service status (up/down)
- Provide device main status (max value vs current value)
- Provide network interface status (up/down & network traffic)
- Provide VoIP interface status and call statistics.
- Search call history for the device and port
- Display Graph Series with System Performance Information
- Monitor Main Status Flow with System Monitoring View

# System Status Information

# Network Interface

The screenshot shows a web-based interface for a GS3000 gateway. The title bar reads "Status Information - GS3000 gateway". Below the title bar are several tabs: "System Status Information", "Network Interface", "VoIP Interface", "Call History", "Performance History", and "Performance Monitoring". The "Network Interface" tab is selected. The main content area is titled "Interface Status" and contains a table with the following data:

Index	Name	IP Address	Speed	Status	Rx Traffic	Tx Traffic	Errors (pkts)
2	FastEthernet0/0	172.16.9.120	100Mbps	● up	10.7Kbps	2.1Kbps	0
3	FastEthernet0/1	192.168.10.1	100Mbps	● down	0 bps	0 bps	0

# VoIP Interface

You can view call summary informations such as total call, ASR, and ACD for the GSM gateway device each

The screenshot displays the 'Status Information - GS3000 gateway' web interface. The 'VoIP Interface' tab is selected, showing 'GSM Call Statistics' and 'VoIP Interfaces Status'.

**GSM Call Statistics**

Inbound Calls				Total			All Clear
VoIP	FXS	FXD	E1	Call	ASR (%)	ACD (sec)	
0	58	0	0	58	94 %	11	

**VoIP Interfaces Status**

Port	Line Type	Line Status	In Gain	Out Gain	Phone Number	GSM Phone Number	Inbound Calls (VoIP/FXS/FXD/E1)	ASR (%)	ACD (sec)

# Performance History

performance analysis graph for last 24 hours

# Performance Monitoring

performance monitoring with proper time interval

# Notification Management

- Notify administrator for important event such as critical device fault when proper action needs
- Provide several notification channel such as SMS, e-mail, alarm lamp
- Notification channel configuration for each event
- Manage notification with device category such as Server, Terminal, PC, etc
- Provide Alarm with audible (play sound), visible (alarm lamp) form

### Event Notification Properties

Notification Name:

Description:

Event:

Destination Path:

Notification Type:

Current Rule:

Apply Category:

- Desktop
- Network Camera
- Phone
- Server
- Switch

Email Subject:

Text Message:

Special Values: Can be used in both the text message and email subject

- %noticeid% = notification ID number
- %time% = time sent
- %severity% = event severity
- %nodeLabel% = may be IP address or empty
- %interface% = IP address, may be empty
- %service% = service name, may be empty
- %eventid% = event ID, may be empty

Note: If the alert exceeds 80 bytes then the notification will be dispatched in two or more sms.

Enable Notification

apply notification policy with event-based filter  
(example : notify me when network link of device is downed through SMS, e-mail)

specify category when each event occurs

describe notification message content for e-mail or SMS

# Event Notification Management

The screenshot shows the Smart Network Management System (NMS) interface. The main window displays a tree view of 'Current Outage Devices' and a table of 'Your Outstanding Notices'. A 'Destination Path Properties' dialog box is open, showing configuration options for a destination path named 'default'. The dialog includes a table for 'Notification Type' with columns for 'Target' and 'Auto Notify'. A red callout box highlights the 'alarmLamp' entry in this table.

**Destination Path Properties**

Destination Path Name: default

Initial Target: [dropdown] Initial Delay: 0m

Notification Type	Target	Auto Notify
alarmLamp	alarmLamp	on
email	admin	on
sms	admin	on

Buttons: Add, Delete, Help, Ok, Cancel

# Fault Statistics

- analyze for a fault event with graph and detailed list data
- Report form generation and print out for statistics result

# Fault Statistics

The screenshot displays the Smart Network Management System (NMS) interface. The top navigation bar includes 'NMS', 'Account', 'Configuration', 'Monitoring', 'Notification', 'Fault', 'Statistics', 'View', and 'Help'. The main content area is divided into several sections:

- Event Summary Table:** A table on the left showing event statistics for various dates from 2009-04-04 to 2009-04-13. Columns include 'Event Time', 'Outsta...', 'Ackno...', 'Not Clea...', 'Cleared', and 'In Pr'. The data shows a significant spike in faults on 2009-04-06 (1453) and 2009-04-05 (1704).
- Search Condition Panel:** Located above the graph, it allows filtering by 'Hour' (4/ 9/2009) and 'Site' (Branch A, Branch AQ, B).
- Fault Statistics (Site) Graph:** A bar chart showing the number of faults per hour for different sites. The x-axis represents time from 01:00 to 23:00. The y-axis represents the 'Fault Count' from 0 to 60. The legend includes Seoul, HeadQuarter, Center, Branch TG, Branch KT, Branch GX, Branch B, Branch AQ, and Branch A. A notable peak occurs at 15:00.
- Detailed Data Table (4/9/2009):** A table below the graph providing a breakdown of faults by site and time. The columns are 'Time', 'Branch A', 'Branch AQ', 'Branch B', 'Branch GX', 'Branch KT', 'Branch TG', 'Center', 'HeadQuarter', 'Seoul', and 'Total'. The total number of faults for the day is 118.
- Your Outstanding Notices (18):** A table at the bottom showing a list of alerts with columns for 'Ack', 'ID', 'Send Time', 'Site', 'Device Name', 'IP Address', 'Service', and 'Message'. The messages describe service outages on various devices like '00\_RBT\_server' and 'NMS\_SDHO\_PBX'.

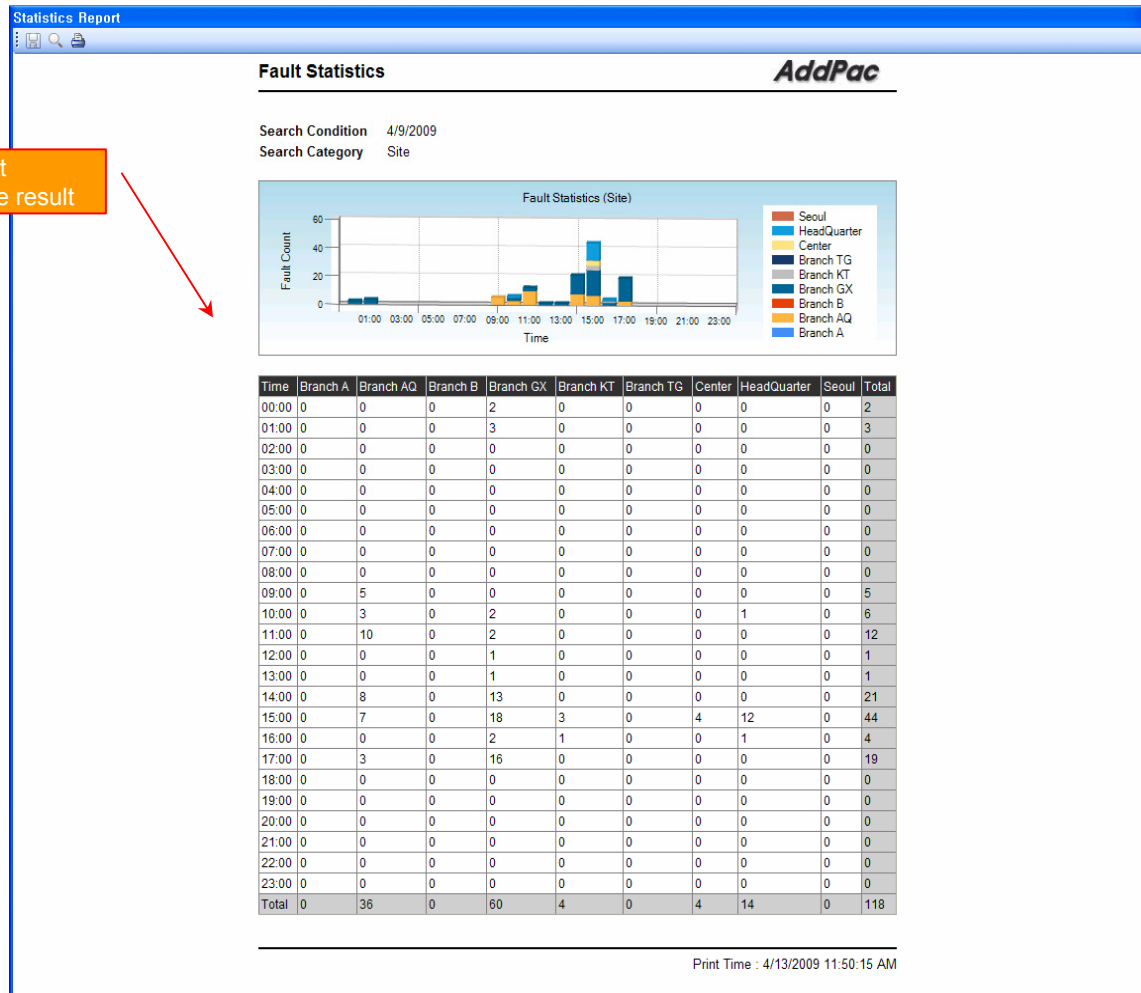

Two orange callout boxes provide additional context:

- The first callout, pointing to the graph, states: "display graph for fault statistics with various search condition".
- The second callout, pointing to the detailed data table, states: "display detailed data for fault statistics".

# Fault Statistics – Report Generation

report generation for fault statistics and print out the result

# Call Statistics

- SmartNMS receives CDR data for calls which is used for call statistics from the VOIP or GSM gateway.
- You can get statistics data with various time interval conditions such as daily and monthly basis for the device and VOIP port.
- Report statistics can be exported to the various document formats such as PDF and MS-Excel.

# Call Statistics

# Call Statistics

# Call Statistics

# Model & Service Management

- Define new model with provided template image & properties
- Customize data collection with standard protocol such as TCP, SNMP

# Device Model Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of sites on the left and a table of device models in the center. A 'Device Model Properties' dialog box is open, showing details for the 'AP-IPC250M' model, including its category ('Network Camera') and management settings. A 'Model Image Management' window is also visible, showing a grid of device images for selection. An orange callout box points to the 'Model Image Management' window with the text: 'model image repository for selection'. Another orange callout box points to the 'Device Model Properties' dialog box with the text: 'manage device model with various properties such as model image'. The interface also shows a 'Your Outstanding Notices' table at the bottom.
