Event Notification Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of network devices and their availability. Overlaid on this are two configuration dialog boxes: 'Destination Path Properties' and 'Target Properties'. The 'Target Properties' dialog is the primary focus, showing a dropdown for 'Choose the notification type:' set to 'sms'. Below this, the 'Target Information' section has 'Send to select user:' selected, with a dropdown menu showing 'Account Administrator'. A red arrow points to this dropdown. An orange callout box with white text reads: "user account (administrator) setting for SMS, E-mail Notification or specify e-mail address or SMS phone number". The 'Destination Path Properties' dialog shows a table of notification targets:

Notification Type	Target	Auto Notify
alarmLamp	alarmLamp	on
email	admin	on
sms	admin	on

At the bottom of the NMS interface, there is a table of 'Your Outstanding Notices (18)'. The table has columns for Ack, ID, Send Time, Site, Device Name, and IP Address. The following table represents the data from this section:
