# System : WAN Setup

The screenshot displays the 'WAN & Tunneling Setup' configuration page in the Smart Web Manager interface. The page is divided into several sections:

- System:** Includes links for Language, WAN Setup, LAN Setup, NAT, NTP, System Time, and File Browser.
- Basic:** Includes links for Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/EML Extension, DTMF/ODDEG, VoIP Dial Plan, FXO Dial Plan, Static Route, and HotLine.
- Advanced:** Includes links for Port Control, Fax, Service, Filtering, Security, and SNMP.
- Miscellaneous:** Includes links for Port & Call Status, System Status, Call Log, System Log, Test Call, and Plug.

The main configuration area is titled 'WAN & Tunneling Setup' and contains the following sections:

- WAN Setup:** Includes fields for Username, IP Address (172.17.208.30), Network Mask (255.255.0.0), Default Route (172.18.1.1), and DNS Servers (Primary and Secondary).
- Static IP:** Includes fields for User Name and Password, and radio buttons for authentication: No Authentication, PAP (RFC 1877 Authentication Protocol), and CHAP (Challenge Handshake Authentication Protocol).
- PPPvE(ADSL):** Includes a radio button for No Authentication and radio buttons for authentication: PAP (RFC 1877 Authentication Protocol) and CHAP (Challenge Handshake Authentication Protocol).
- DWCP:** Includes a radio button for No Authentication and radio buttons for authentication: PAP (RFC 1877 Authentication Protocol) and CHAP (Challenge Handshake Authentication Protocol).
- VLAN:** Includes a field for ID.
- WAN Link Control:** Includes radio buttons for Auto, Manual, Duplex, Speed (100, 10), and Chaf.
- NAT & Bridge:** Includes radio buttons for None, NAT, and Bridge.
- MAC(Hardware) Address:** Includes a field for the address.
- Tunneling Setup:** Includes radio buttons for None (Disable Tunneling, default) and CHPTP (Point-to-Point Tunneling Protocol). It also includes fields for User Name, Password, Mode (No Authentication, PAP, CHAP), Phone Number (Username), Source (FixedName), and Destination (A.B.C.D (Tunnel End Point Address)).
- Service:** Includes radio buttons for Voice and Data Use Tunnel Interface (default), Voice Use Tunnel Interface, Data Use Ethernet Interface, and Data Use Tunnel Interface, Voice Use Ethernet Interface.

On the right side, there is an 'Information' panel with details about the device (AddPac Technology, Model AP210\_02, HW Version 2.2, SW Version 2.4.0.0.0, Smart Web Version 0.4, Smart Web Build: Oct 18 2011) and a 'Description' panel with a note about static IP assignment and MAC address changes.

# System : LAN Setup

The screenshot displays the 'LAN Setup' configuration page in the Smart Web Manager. The interface is organized into several sections:

- System:** A sidebar menu on the left containing options like Language, WAN Setup, LAN Setup, NAT, NTP, System Time, and File Browser.
- Basic:** A sidebar menu containing options like Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/EnM Extension, DTMF/CODEC, VoIP Dial Plan, FXO DialPlan, Static Route, and Hot Line.
- Advanced:** A sidebar menu containing options like Port Control, Fax, Service, Filtering, Security, and SNMP.
- Miscellaneous:** A sidebar menu containing options like Port & Call Status, System Status, Call Log, System Log, Test Call, and Ping.

The main content area is titled 'LAN Setup' and features three radio button options: 'None' (selected), 'IP Share (IP Connect)', and 'Static'. The 'Static' option is expanded, showing fields for 'Enable DHCP Server', 'Default Lease time' (0 seconds), 'Address Range', and 'DNS Server'. An 'Apply' button is located at the bottom left of the main area.

On the right side, there are two informational panels:

- Information:** Displays device details such as AddPac Technology, Model: AP2610\_G2, HW Version: 2.0, SW Version: 0.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: S(4), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, and Mac Address: 0002.a4ff.f0a0.
- Description:** Provides a detailed explanation of the LAN port setting, noting that it is used for connected PCs internally and recommending IP share for one PC and static for many. It also lists recommended address bands for static configurations.

# System : NAT

The screenshot shows the Smart Web Manager interface for configuring NAT. The main area is titled "NAT Static Table" and contains a table with the following columns: IP Protocol, Global Port, Local Address, Local Port, and Selection. The "IP Protocol" column has a dropdown menu currently set to "tcp". There are empty input fields for "Global Port", "Local Address", and "Local Port", and an "Add" button in the "Selection" column. On the left, a navigation menu is visible with categories: System, Basic, Advanced, and Miscellaneous. On the right, an "Information" panel displays system details such as AddPac Technology Model, HW Version, SW Version, Smart Web Version, Smart Web Build, Voice Interface, Protocol, Status, Current Calls, CallNetwork, and Mac Address. A "Description" panel at the bottom right contains a note about creating a table for delivering TCP/UDP port to PC.

IP Protocol	Global Port	Local Address	Local Port	Selection
tcp				Add

# System : NTP (Network Time Protocol)

The screenshot displays the 'Smart Web Manager' interface for configuring the Network Time Protocol (NTP). The page is titled 'NTP' and features a left-hand navigation menu with categories: System, Basic, Advanced, and Miscellaneous. The 'System' menu is expanded, showing options like Language, WAN Setup, LAN Setup, NAT, NTP, System Time, and File Browser. The main configuration area includes a radio button to 'Enable' or 'Disable' NTP. Below this, there are input fields for 'Primary Server' and 'Secondary Server', both with a note '(Domain Name or IP Address)'. The 'Interval' is set to '(1-72 hours)' and the 'Timezone' is configured with 'Name' and 'Offset' fields, with a note '(c23-23 hours) : (0-90 minute)'. An 'Apply' button is located at the bottom left of the configuration area. On the right side, there is an 'Information' panel showing device details: AddPac Technology, Model: AP2610\_G2, S/W Version: 2.0, S/W Version: 5.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: S(i), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, and Mac Address: 0002.441f.0a0. Below the information panel is a 'Description' section titled 'Setup NTP Server'.

# System : System Time

The screenshot displays the 'System Time' configuration page in the Smart Web Manager interface. The page is titled 'System Time' and shows the current time as 'Fri Jan 15 07:08:23 2021'. Below this, there is a 'Set System Time' section with input fields for Year, Month, Day, Hour, Min, and Sec. An 'Apply' button is visible below the input fields. The left sidebar contains a navigation menu with categories: System (Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser), Basic (Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/EnM Extension, DTMF/CODEC, VoIP Dial Plan, FXO DialPlan, Static Route, Hot Line), Advanced (Port Control, Fax, Service, Filtering, Security, SNMP), and Miscellaneous (Port & Call Status, System Status, Call Log, System Log, Test Call, Ping). The right sidebar contains an 'Information' section with details: AddPac Technology, Model: AP2910\_02, HW Version: 2.0, SW Version: 8.41.090, Smart Web Version: 9.4, Smart Web Build: Oct 18 2011, Voice Interface: S(4), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, Mac Address: 0002.a4ff.5a0. Below the information is a 'Description' section with the text 'Setup System Time'.

# System : File Browser

The screenshot displays the 'Smart Web Manager' interface, specifically the 'File Browser' section. The main content area shows the 'Index of Root/flash/' directory. A table lists the following items:

Name	Size	Type	Last Modified
Parent Directory/		Directory	
tmp/		Directory	2105-Feb-7 05:28:15
ap2610_g2_v8_41_090.bin	3.2M	BIN	2018-Nov-30 07:10:45
apos.cfg	1.9K	CFG	2019-Mar-22 05:02:59

Below the table, there are buttons for file management: '파일 선택' (File Select), '선택된 파일 업로드' (Upload Selected Files), and 'Upload'. The left sidebar contains a navigation menu with categories: System, Basic, Advanced, and Miscellaneous. The right sidebar shows system information, including 'AddPac Technology' details, model 'AP3610\_052', and various system parameters like SIP status and MAC address.

# Basic

# Basic : Protocol

The screenshot displays the Smart Web Manager interface for configuring the Protocol. The main content area shows two radio button options:  SIP(Session Initiation Protocol) and  H.323(TU H.323 Protocol). Below these options is a green 'Apply' button. The left sidebar contains a navigation menu with categories: System (Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser), Basic (Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/E/M Extension, DTMF/CODEC, VoIP Dial Plan, FXO DiaPlan, Static Route, Hot Line), Advanced (Port Control, Fax, Service, Filtering, Security, SNMP), and Miscellaneous (Port & Call Status, System Status, Call Log, System Log, Test Call, Ping). The right sidebar contains an 'Information' section with details: AddPac Technology, Model: AP2610\_G2, HW Version: 2.0, SW Version: 8.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: S(4), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, Mac Address: 0002.a4ff.0ba0. Below this is a 'Description' section with the text: 'Configure the settings of the protocol to be used for VoIP communication.'

# Basic : Server SIP

Smart Web Manager  
www.addpac.com

## SIP (Session Initiation Protocol)

Use SIP Server  Yes  No

Primary SIP Server  Server address and Port (default 5060)

Secondary SIP Server  Server address and Port (default 5060)

Local Domain Name  (SIP userpart of authentication)

SIP Signaling Port  (default 5060, between 1 to 65535)

Register Expiration  (in seconds, default 60, between 10 to 86400)

Session Re-Fresh  INVITE  UPDATE

Session Expire Time  (in seconds, default 1800, between 30 to 86400, 0 = disable)

Min. SE  (in seconds, default 1800, between 30 to 86400)

# Basic : Server H.323

The screenshot displays the configuration interface for the H.323 (ITU H.323 Protocol) in the Smart Web Manager. The interface is organized into several sections:

- System:** Includes options for Language, WAN Setup, LAN Setup, NAT, NTP, System Time, and File Browser.
- Basic:** Contains the main configuration options for the H.323 protocol:
  - Use H.323 Server:** A radio button selection set to "Yes".
  - Primary Gatekeeper:** A text input field containing "1718" with a tooltip "Server address and Port (default 1718)".
  - Secondary Gatekeeper:** A text input field containing "1719" with a tooltip "Server address and Port (default 1719)".
  - H.323 ID:** A text input field containing "voip.172.16.17.2" with a tooltip "(H.323 Identifier string)".
  - H.323 Signaling Port:** A text input field containing "1720" with a tooltip "(default 1720, between 1 to 65535)".
  - H.323 Call start mode:** Radio buttons for "Fast" (selected) and "Slow".
  - H.323 Tunnel mode:** Radio buttons for "Enable" (selected) and "Disable".
- Advanced:** Includes Port Control, Fax, Service, Filtering, Security, and SNMP.
- Miscellaneous:** Includes Port & Call Status, System Status, Call Log, System Log, Test Call, and Ping.
- Information:** A sidebar on the right providing system details:
  - AddPac Technology
  - Model: AP2610\_02
  - HW Version: 2.0
  - S/W Version: 8.41.090
  - Smart Web Version: N/A
  - Smart Web Build: Oct 18 2011
  - Voice Interface: S/I
  - Protocol: H.323
  - Status: Unregistered
  - Current Calls: 0
  - CallNetwork: Static
  - 172.17.208.30
  - Mac Address: 0002.a4ff.03a0
- Description:** A sidebar on the right with the text: "Configure the settings for H.323. Contact your service provider for the settings."

An "Apply" button is located at the bottom left of the configuration area.

Description

# Basic : DTMF/CODEC

The screenshot displays the Smart Web Manager interface for configuring DTMF and CODEC settings. The main content area is titled "DTMF/CODEC" and contains the following elements:

- Voice CODEC:** A list of six preferences, each with a dropdown menu showing the selected codec and its bitrate:
  - Preference 1: g711alaw - G711 a-law Codec Type(64 kbps)
  - Preference 2: g711alaw - G711 a-law Codec Type(64 kbps)
  - Preference 3: g72932 - G729 ADPCM Type(32 kbps)
  - Preference 4: g72916 - G729 ADPCM Type(16 kbps)
  - Preference 5: g729 - G729 Codec Type(8 kbps)
  - Preference 6: g7231163 - G723.1 Codec Type(6.3 kbps)
- DTMF Relay mode:** Four radio button options:
  - DTMF relay by In-band voice
  - DTMF relay by RTP payload defined by RFC 2833
  - DTMF relay by Out-of-band signal
  - DTMF relay by Cisco out-of-band signal
- Apply:** A green checkmark icon and the text "Apply" are visible at the bottom left of the configuration area.

The interface also features a left-hand navigation menu with categories: System, Basic, Advanced, and Miscellaneous. On the right side, there are two panels: "Information" (showing device details like Model: AP2610\_G2, S/W Version: 8.41.090) and "Description" (with the text "Configure the settings for GSM Dial Plan and Prefix table").

# Basic : VoIP Dial Plan

The screenshot shows the Smart Web Manager interface for configuring a VoIP Dial Plan / Prefix. The interface is divided into several sections:

- Systems:** Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser.
- Basic:** Protocol, Server SIP, Server H.323, SIP Registration, IAX Registration, FXS Extension, FXO/E/M Extension, DTMF/CODEC, **VoIP Dial Plan**, FXO Dial Plan, Static Route, Hot Line.
- Advanced:** Port Control, Fax, Service, Filtering, Security, SNMP.
- Miscellaneous:** Port & Call Status, System Status, Call Log, System Log, Test Call, Ping.

The main configuration area is titled "VoIP Dial Plan / Prefix" and contains two tables:

- Plan Table:** A table with columns: Rule Num, Digits to Insert, Digits to delete, Digit Pattern, and Control. It includes "Delete" and "Add" buttons.
- Prefix Table:** A table with columns: Voip Num, Prefix, Called Num Plan, Calling Num Plan, Hunt Stop, and Control. It includes "Delete" and "Apply" buttons.

Below the Prefix Table, there are two red asterisked notes:

- \* VoIP Dial Plan - Assigned Translation-Rule Tag Number: 0 - 99
- \* VoIP Dial Plan - Assigned VoIP Tag Number: 10000 - 10099

On the right side, there is an **Information** panel with the following details:

- Model: AP2610\_G2
- hW Version: 2.0
- SW Version: 8.41.090

- 172.17.208.30
- Mac Address: 0002-a4ff-80a0

Below the information panel is a **Description** panel with the text: "Configure the settings for the outbound call of main/remote and incoming E1/T1 and routing."

# Basic : FXO Dial Plan

The screenshot shows the Smart Web Manager interface for configuring an FXO Dial Plan / Prefix. The interface is divided into several sections:

- System:** Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser.
- Basic:** Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/E1M Extension, DTMF/CODEC, VoIP Dial Plan, **FXO Dial Plan**, Static Route, Hot Line.
- Advanced:** Port Control, Fax, Service, Filtering, Security, SNMP.
- Miscellaneous:** Port & Call Status, System Status, Call Log, System Log, Test Call, Ping.

The main configuration area is titled "FXO Dial Plan / Prefix" and contains the following sections:

- Port Information:** A table showing port configurations for P0, P1, P2, and P3.
 

Port	P0	P1	P2	P3
SLOT 0	FXO	FXO	FXO	FXO
	FXS	FXO/E1M	E1/T1	
- Plan Table:** A table for defining dial plan rules.
 

Rule Num	Digits to Insert	Digits to delete	Digit Pattern	Control
	<input type="text"/>	<input type="text"/>	<input type="text"/>	Delete
				Add
- FXO Table:** A table for defining FXO parameters.
 

Pots Num	FXS/FXO	FXO	Number	PlanIndex	Preference	Forward Digits	Control
		P00	<input type="text"/>	N.A	9	<input type="text"/>	Delete
							Apply

Additional information at the bottom of the configuration area:

- \* FXO Dial Plan - Assigned Translation-Rule Tag Number: 100 - 199
- \* FXO Dial Plan - Assigned Pots Tag Number: 5500 - 4071

The right sidebar contains system information:

- Information:** AddPac Technology, Model: AP2610\_02, HW Version: 2.0, SW Version: 8.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: O(4), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, Mac Address: 0002.a4ff.0a00.
- Description:**

# Basic : Static Route

The screenshot displays the 'Smart Web Manager' interface for configuring a 'Static Route'. The page title is 'Static Route' and includes a sub-header: 'Set Remote Site Call(5-digit number is set to begin \*2-\*2...)'. Below this is a table with the following columns: 'Pots Num', 'Remote Site IP', 'Signaling Port', 'Pref.', 'Digits to Insert', 'Digits to Delete', 'Name of Remote Site', 'Answer Addr', and 'Control'. The 'Pots Num' column contains an asterisk (\*), and the 'Control' column has an 'Apply' button. To the left of the table, there are two red asterisked notes: '\* Static Route - Assigned Voip Tag Number : 10100 - 10199' and '\* Static Route - Assigned Translation-Rule Tag Number : 10100 - 10199'. The interface also features a left-hand navigation menu with categories: 'System' (Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser), 'Basic' (Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/FM Extension, DTMF/CODEC, VoIP Dial Plan, FXD DiaPlan, Static Route, Hot Line), 'Advanced' (Port Control, Fax, Service, Filtering, Security, SNMP), and 'Miscellaneous' (Port & Call Status, System Status, Call Log, System Log, Test Call, Ping). On the right side, there is an 'Information' panel showing details like 'AddPac Technology', 'Model : AP2810\_02', 'HW Version : 2.0', 'SW Version : 8.41.090', 'Smart Web Version : 0.4', 'Smart Web Build : Oct 18 2011', 'Voice Interface : O(4)', 'Protocol : SIP', 'Status : Unregistered', 'Current Calls : 0', 'CallNetwork : Static', '172.17.208.30', and 'Mac Address : 0002-a1ff-0a0'. Below the information panel is a 'Description' section.

# Basic : Hot-Line

The screenshot displays the Smart Web Manager interface for configuring Hot Lines. The main content area is titled "Hot Line" and contains a "Hot Line Configuration" table. The table has three columns: "Port", "Hot Line Number", and "Digit Input Timeout -0-10 sec-". There are four rows corresponding to ports S0P0(O), S0P1(O), S0P2(O), and S0P3(O). Each row has input fields for the Hot Line Number and a dropdown menu for the Digit Input Timeout, all currently set to 0. An "Apply" button is located below the table.

Port	Hot Line Number	Digit Input Timeout -0-10 sec-
S0P0(O)	<input type="text"/>	0
S0P1(O)	<input type="text"/>	0
S0P2(O)	<input type="text"/>	0
S0P3(O)	<input type="text"/>	0

**Description**

For FTP, HTTP, Telnet, set up one IP or IP band for allowing access

# Advanced : Security

The screenshot displays the 'Smart Web Manager' interface for configuring security settings. The main content area is titled 'Security' and contains several sections:

- IP Filtering:** Includes a radio button to toggle between 'Enable' and 'Disable'. Below it is an 'Allowed IP Address List' with an input field and 'Apply' and 'Delete' buttons.
- Wardialing Filtering:** Includes a radio button to toggle between 'Enable' and 'Disable'.
- Allow Digit Length(IP to PSTN):** Includes input fields for 'Min' and 'Max' values.
- H323 Shutdown:** Includes a radio button to toggle between 'Enable' and 'Disable'.
- SIP Shutdown:** Includes a radio button to toggle between 'Enable' and 'Disable'.

At the bottom of the main content area, there is a green checkmark and the text 'Apply'. On the right side, there is an 'Information' panel with the following details:

- Model: AP2610\_02
- SW Version: 2.0
- Smart Web Version: 0.4
- Smart Web Build: Oct 18 2011

# Miscellaneous : System Log

The screenshot displays the 'Smart Web Manager' interface. The main content area is titled 'System Log' and contains two sections: 'command logging buffers (messages logged)' and 'event logging buffers (messages logged)'. Both sections are currently empty. On the left side, there is a navigation menu with categories: 'System' (Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser), 'Basic' (Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/EnM Extension, DTMF/COEC, VoIP Dial Plan, FXO DiaPlan, Static Route, Hot Line), 'Advanced' (Port Control, Fax, Service, Filtering, Security, SNMP), and 'Miscellaneous' (Port & Call Status, System Status, Call Log, System Log, Test Call, Ping). On the right side, there is an 'Information' panel showing device details: AddPac Technology, Model: AP2610\_G2, HW Version: 2.0, SW Version: 2.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: O(4), Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, and Mac Address: 9002 a4ff 0a90. Below this is a 'Description' panel with the text 'Retrieve the system log'.

# Miscellaneous : Test Call

The screenshot displays the Smart Web Manager interface for configuring a Test Call. The page is titled "Test Call" and features a table with the following columns: Port, B-Ch (1-31), Test Phone Number, Digits, and Command. The table is currently empty. On the left side, there is a navigation menu with categories: System (Language, WAN Setup, LAN Setup, NAT, NTP, System Time, File Browser), Basic (Protocol, Server SIP, Server H.323, SIP Registration, H.323 Registration, FXS Extension, FXO/ENM Extension, DTMF/CODEC, VoIP Dial Plan, FXO DialPlan, Static Route, Hot Line), Advanced (Port Control, Fax, Service, Filtering, Security, SNMP), and Miscellaneous (Port & Call Status, System Status, Call Log, System Log, Test Call, Ping). On the right side, there is an "Information" section with details: AddPac Technology, Model: AP2610\_G2, HW Version: 2.0, SW Version: 8.41.090, Smart Web Version: 0.4, Smart Web Build: Oct 18 2011, Voice Interface: 0/4, Protocol: SIP, Status: Unregistered, Current Calls: 0, CallNetwork: Static, 172.17.208.30, Mac Address: 0002.a4ff.10a0. Below the information is a "Description" section with the text: "Make a test call remotely through web".

# Miscellaneous : Ping

The screenshot displays the Smart Web Manager interface for configuring a Ping test. The main content area features a 'Host address' input field and a 'Start' button. The left sidebar contains a navigation menu with categories: System, Basic, Advanced, and Miscellaneous. The 'Miscellaneous' category is expanded, showing 'Ping' as the selected option. The right sidebar provides system information and a description of the Ping function.
