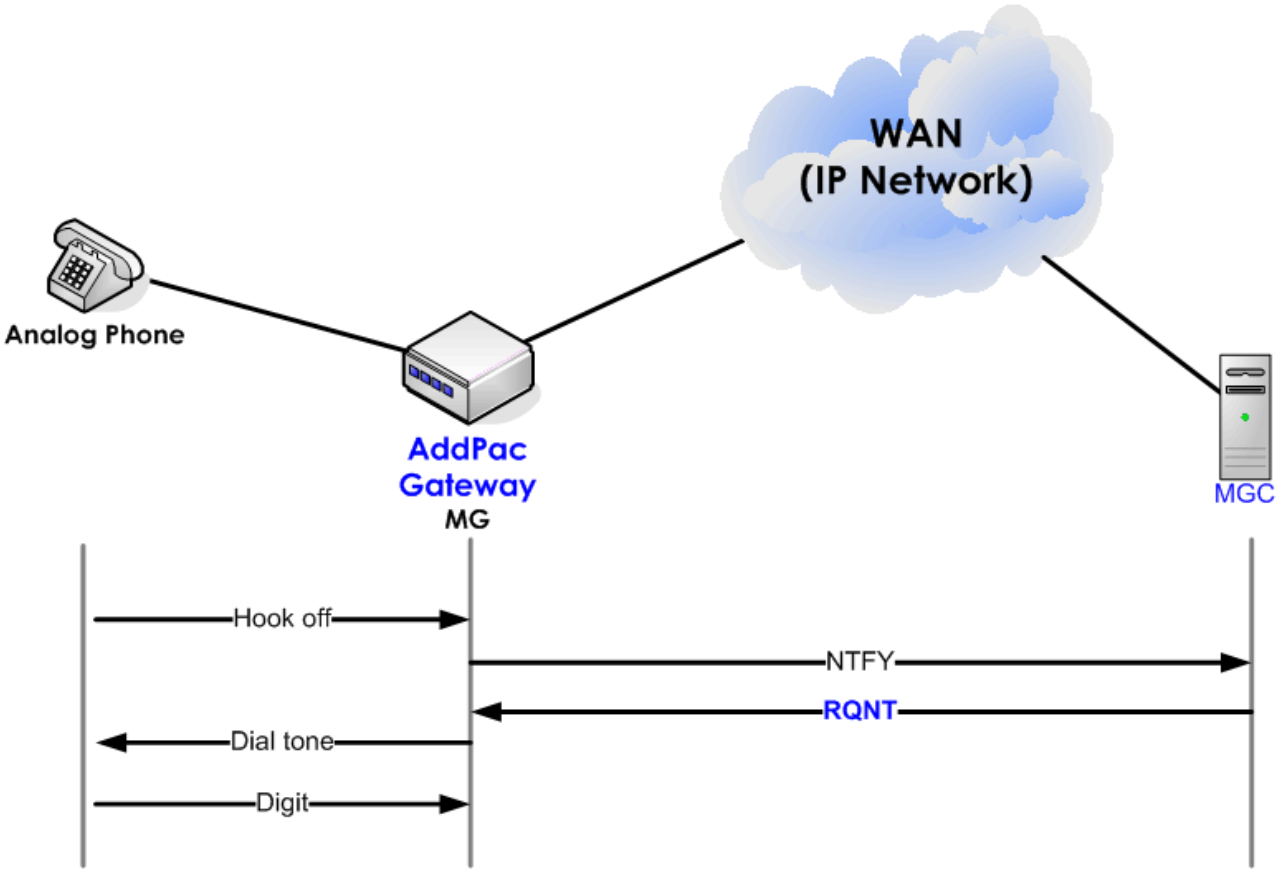
MGCP Digit map Manual Configuration Function Added

Category	S/W Release Version	Date
MGCP	8.00	Apr. 2004

Function Description

This command configures the **Digit Map** manually on MG (Media Gateway). This function is required when the list of **Digit Map** from MGC is burdensome, or it is necessary to keep the **Digit Map** on MG for the operational purpose. In order to apply MG's **Digit Map**, the **Digit Map** Parameter (Code: D) of RQNT should be configured as "x.T." If it is other then "x.T," the manually configured **Digit Map** is ignored, but the MG utilizes the **Digit Map** from MGC.



Related Commands

```
(config)# mgcp
(config-mgcp)# digit-map
<[0-9#*]|[].XT>              Address Pattern String
```

Configuration example

```
(config)# mgcp
(config-mgcp)# digit-map 022XXXXXXX
(config-mgcp)# digit-map 02700XXXX
(config-mgcp)# digit-map 016[2-8]XXXXXX
(config-mgcp)# digit-map 011[245678]XXXXXX
(config-mgcp)# digit-map 0113XX.T

(config-mgcp)# show run
