

Smart GSM NMS

Smart Network Management System

Smart GSM NMS Overview

The screenshot displays two windows from the Smart GSM NMS. The top window, titled 'Status Information - IPNext 3000 Master', shows system status information including Today's Availability, CPU Utilization (95%), Memory Utilization (67%), and Storage Utilization (Total: 296 GB, Used: 203.4 MB, Free: 297.6 GB). The bottom window, titled 'Status Information - GS3000 gateway', shows a 'Device Call History' table with columns for ID, Create Time, Duration, Caller Type, Caller Number, Called Type, Called Number, Remote IP, GSM Phone N., Codec, and Status. The table contains 15 rows of call records with various statuses like 'Failed', 'Success', and 'Failed'.

ID	Create Time	Duration	Caller Type	Caller Number	Called Type	Called Number	Remote IP	GSM Phone N.	Codec	Status
346	11/18/2010 3:54:50 PM	00:00:00	FXS	7000	Unknown	9999	172.16.9.18		g711alaw	Failed

Network Resource Management

- ? Network resource management with hierarchical structure
- ? Role-based resource management for each administrator

The screenshot displays the AddPac Network Resource Management interface. On the left, a hierarchical tree structure shows the organization of network resources, including sites like 'AddPac' and 'Seoul', and various sub-networks and branches. A context menu is open over the 'GangNamGu' node, with 'Execute SMM' highlighted. An orange callout box points to this menu with the text: 'can cooperate with the application executables such as SMM'. In the center, a table lists device categories with their descriptions. An orange callout box points to this table with the text: 'manage the complex network with a structured, hierarchical form'. On the right, a 'User Properties' dialog box is open, showing a tree view of the same hierarchical structure. An orange callout box points to this dialog with the text: 'can assign the hierarchical node to the operator and manage role-based policy'. The bottom of the interface shows a search bar and a status bar indicating 'Total Categories : 6'.

Device Fault History Management

- ? Provide both summary view and detailed event message
- ? Can Write troubleshooting job note for each event manually
- ? Administrator can query for a history fault with search condition
- ? Each fault is related to the several raw events

Device Fault History Management

daily fault event summary statistics information

detail fault event history list up with filter condition (advanced search)

The screenshot displays the Smart Network Management System (NMS) interface. At the top, there is a navigation menu with options like NMS, Account, Configuration, Monitoring, Notification, Fault, Statistics, View, and Help. Below this, there are several tabs for different views: Site, Notification Summary, Service Outages, Device Monitoring, Device Group, Device Category, and Device Model. The 'Notification Summary' tab is active, showing a table with columns for Date/Time, Outstanding, and Acknowledge. Below this, the main 'Fault' view shows a table with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, Message, and Respond Time. An 'Advanced Search' dialog box is open, allowing users to filter results by Sub Network, Site, IP Address, Notice Status Type, Message Contains, and Sort By. The search results show a list of fault events, including details like device names (e.g., NMS Camera, 5th floor meeting room phone device) and messages (e.g., 'interface 172.16.4.180 (172.16.4.180) device(NMS Camera) service SNMP failed at 2009-4-10 5:51:06 PM').

Device Fault History Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a table of device fault history with columns for Date/Time, Outstanding status, Acknowledge status, ID, Send Time, Site, Device Name, IP Address, Service, Message, Responder, and Respond Time. A 'Troubleshooting Note' dialog box is open, allowing users to add, edit, or delete notes for specific events. An orange callout box points to the 'Add' button in the dialog, stating 'Can write troubleshooting note if needed'.

Performance Monitoring

Notification Management

- ? Notify administrator for important event such as critical device fault when proper action needs
- ? Provide several notification channels such as SMS, e-mail, alarm lamp
- ? Notification channel configuration for each event
- ? Manage notification with device category such as Server, Terminal, PC, etc
- ? Provide Alarm with audible (playsound), visible (alarm lamp) form

Event Notification Management

apply notification policy with event-based filter
(example : notify me when network link of device is downed through SMS, e-mail)

specify category when each event occurs

describe notification message content for e-mail or SMS

Event Notification Properties

Notification Name: serviceUnresponsive
 Description: test
 Event: Node event: serviceUnresponsive
 Destination Path: default
 Notification Type: sms, alarmLamp, email
 Current Rule: IPADDR IPLIKE ****
 Apply Category: Desktop, Network Camera, Phone, Server, Switch
 Email Subject: Notice #%noticeid%: %service% service on %interfaceresolve% (%interface%)
 Text Message: The %service% poll to interface %interfaceresolve% (%interface%) on node %nodelabel% successfully completed a connection to the service listener on the remote machine. However, the synthetic transaction failed to complete within %param[timeout]% milliseconds, over %param[attempts]% attempts. This event will NOT impact service level agreements, but may be an indicator of other problems on that node.

Notification Name	Event	Destination Path	Description
serviceUnresponsive	Node event: serviceUnresponsive	NMS Admin	test
serviceResponsive	Node event: serviceResponsive	NMS Admin

Event Notification Management

The screenshot displays the Smart Network Management System (NMS) interface. The main window shows a tree view of network devices and their service availability. A dialog box titled "Destination Path Properties" is open, allowing configuration of notification channels. The dialog includes a table for "Notification Type" with columns for "Target" and "Auto Notify". A red arrow points to the "alarmLamp" entry in this table. An orange callout box contains the text "define notification channel such as e-mail, sms, or alarmlamp".

Destination Path Properties Dialog:

- Destination Path Name: default
- onlyAlarmLamp
- Initial Target: (empty)
- Initial Delay: 0m
- Notification Type Table:

Notification Type	Target	Auto Notify
alarmLamp	alarmLamp	on
email	admin	on
sms	admin	on
- Escalation: (empty)
- Delay: 0m

Fault Statistics

- ? analyze for a fault event with graph and detailed list data
- ? Report form generation and print out for statistics result

Fault Statistics

The screenshot displays the Smart Network Management System (NMS) interface. The main content area is divided into several sections:

- Event Summary Table:** A table on the left showing event statistics for various dates from 2009-04-04 to 2009-04-13. Columns include Event Time, Outsta..., Ackno..., Not Clea..., Cleared, and In Pr.
- Search Condition Panel:** A panel above the graph allowing users to filter data by Hour (4/ 9/2009) and Site (Branch A, Branch AQ, B).
- Fault Statistics (Site) Graph:** A bar chart showing fault counts over time for different sites. The legend includes Seoul, HeadQuarter, Center, Branch TG, Branch KT, Branch GX, Branch B, Branch AQ, and Branch A.
- Detailed Data Table (4/9/2009):** A table showing fault counts for each hour of the day, broken down by site. The total count for the day is 118.
- Your Outstanding Notices (18):** A list of notices at the bottom, including Ack ID, Send Time, Site, Device Name, IP Address, Service, and Message.

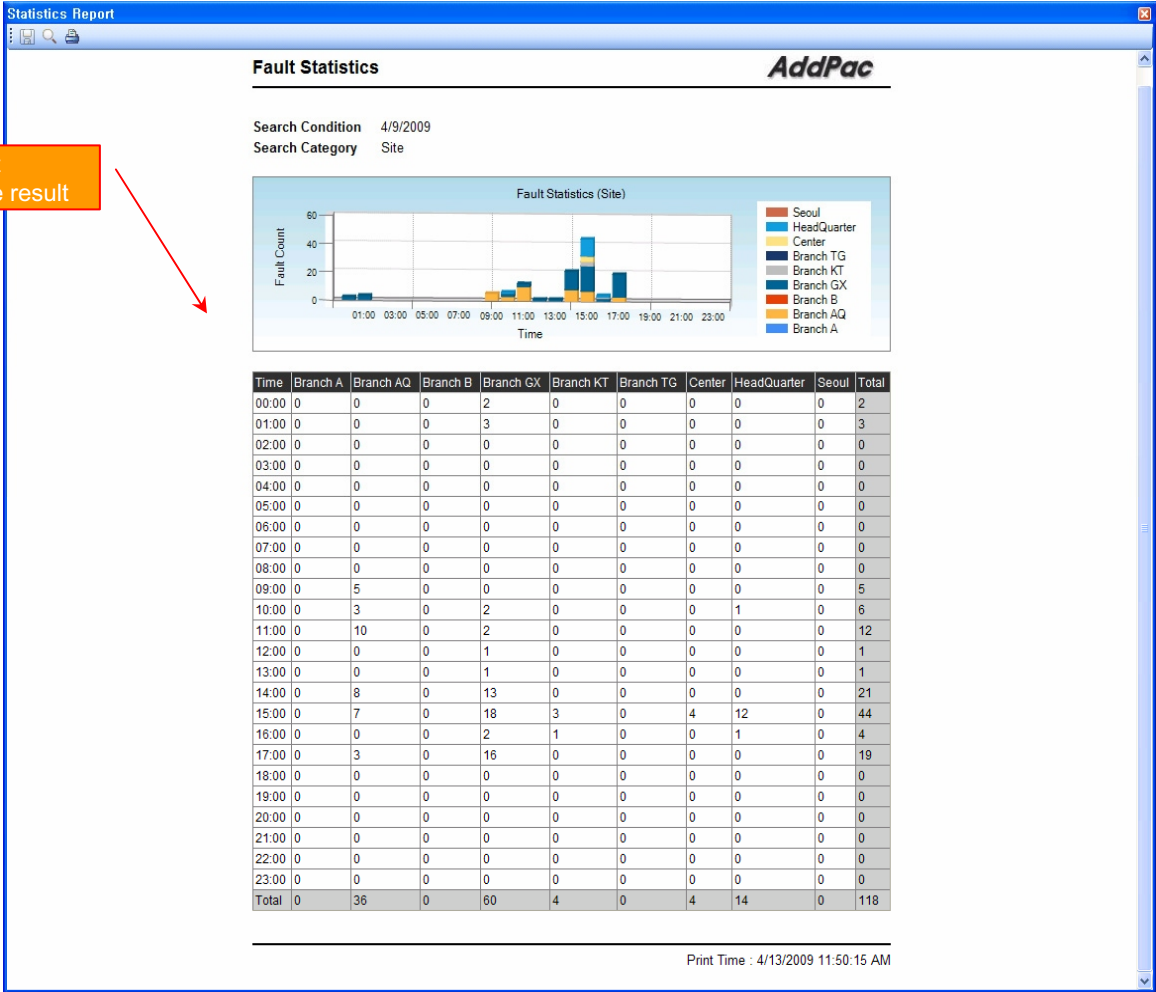

Two orange callout boxes provide additional context:

- display graph for fault statistics with various search condition:** Points to the Fault Statistics (Site) graph.
- display detailed data for fault statistics:** Points to the detailed data table for 4/9/2009.

Fault Statistics ? Report Generation

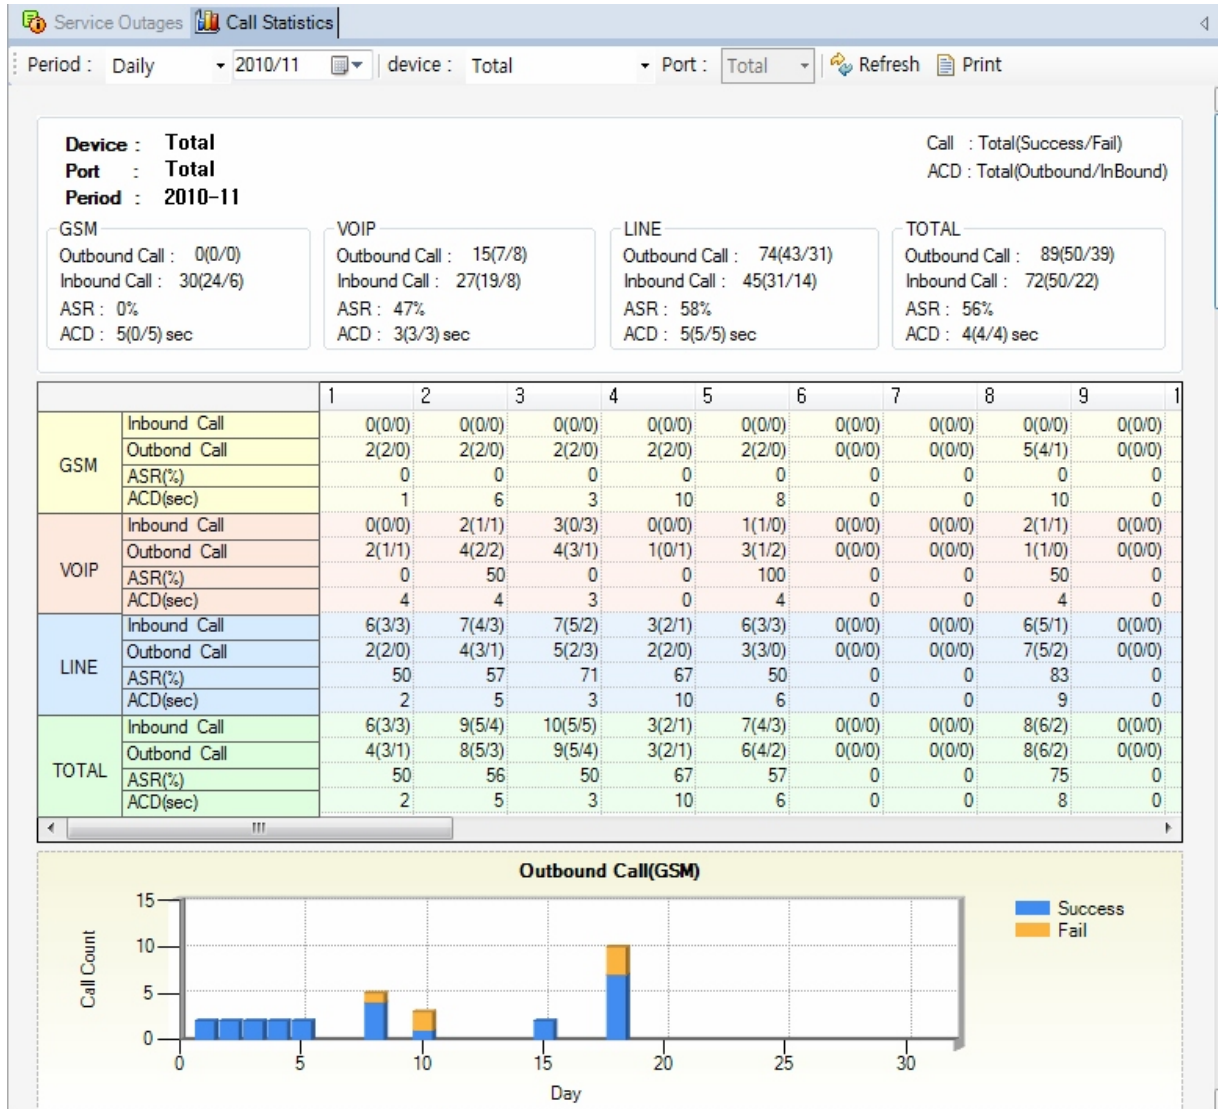

report generation for fault statistics and print out the result

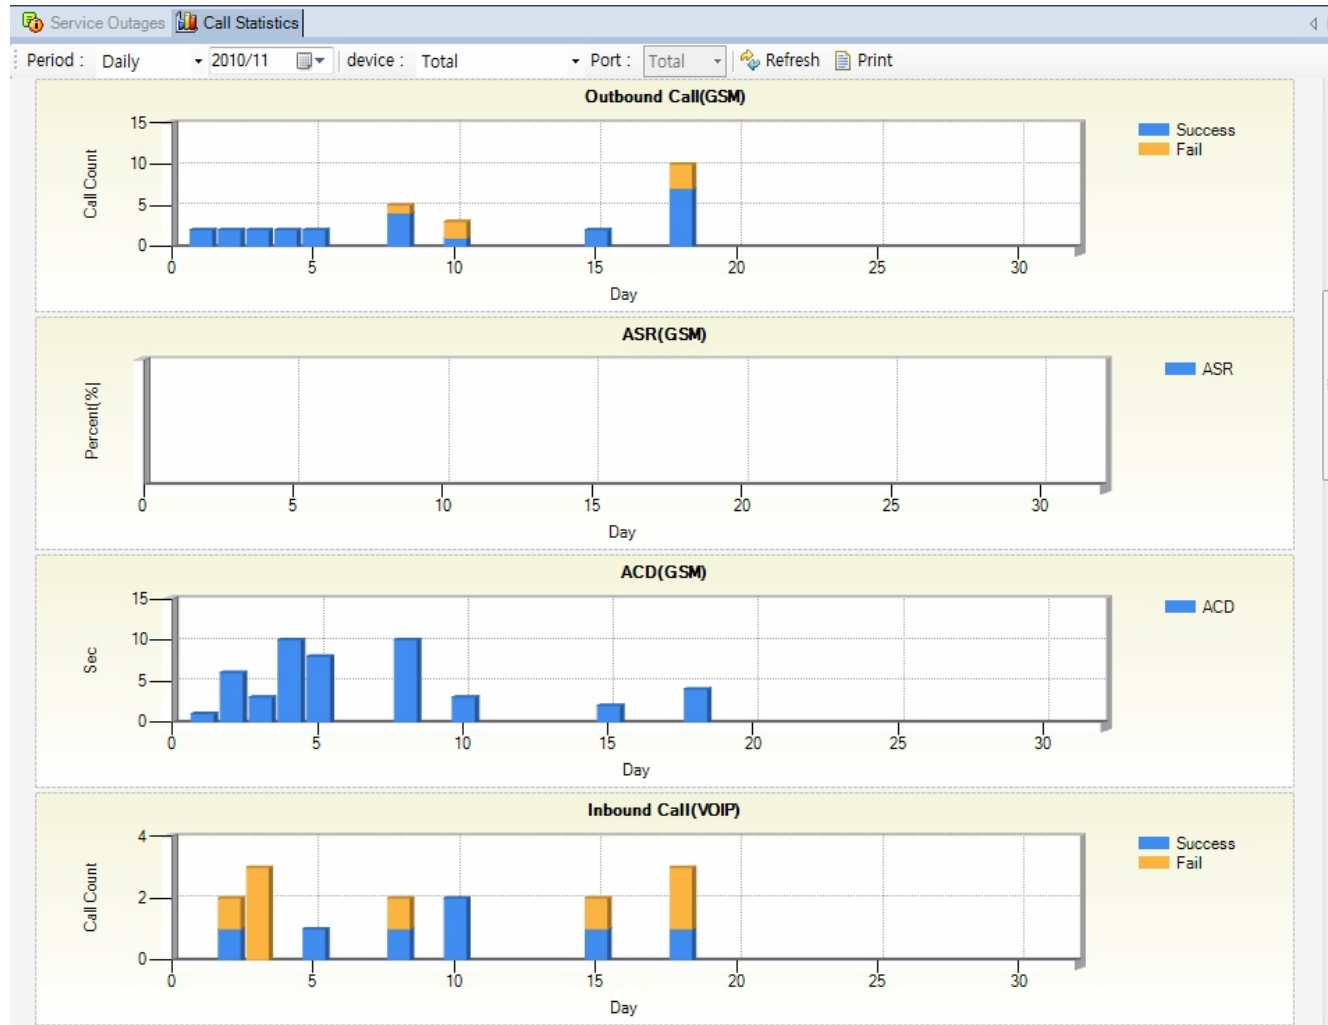

Call Statistics

- ? SmartNMS receives CDR data for calls which is used for call statistics from the VOIP or GSM gateway.
- ? You can get statistics data with various time interval conditions such as daily and monthly basis for the device and VOIP port.
- ? Report statistics can be exported to the various document formats such as PDF and MS-Excel.

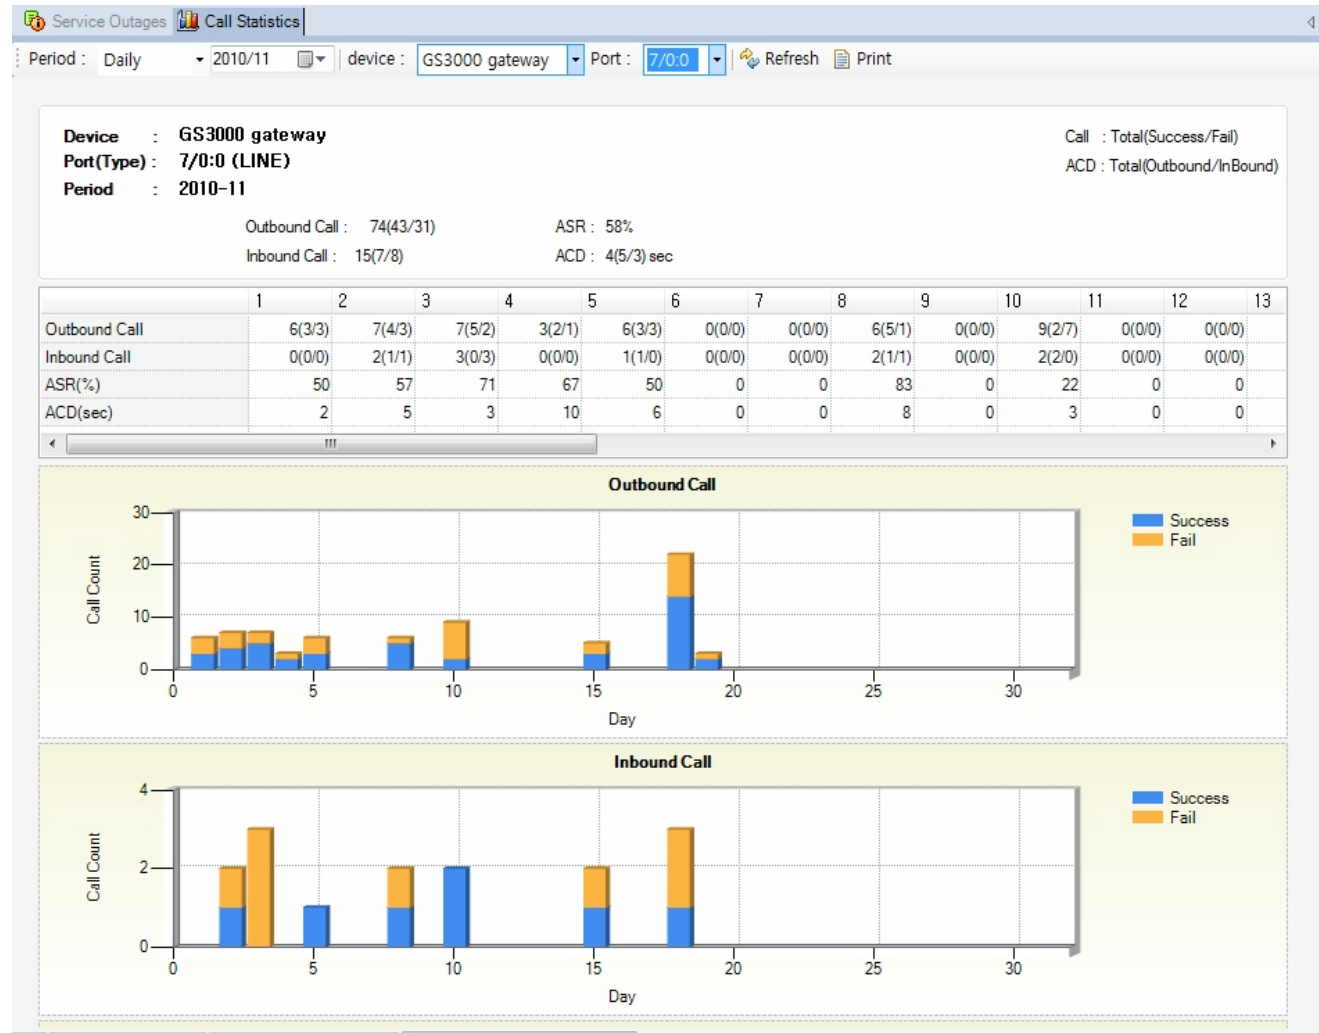

Call Statistics

Call Statistics

Call Statistics

Model & Service Management

- ? Define new model with provided template image & properties
- ? Customize data collection with standard protocol such as TCP, SNMP

Device Model Management

manage device model with various properties such as model image

model image repository for selection

Service Definition

define the service for data collection, current status with standard protocol such as TCP or SNMP

The screenshot displays the Smart Network Management System (NMS) interface in Internet Explorer. The main window shows a tree view of sites and a table of services. A 'Service Properties' dialog box is open, showing the configuration for the 'Camera Operation Status' service.

Service Name	Protocol	Port
Call Manager	SNMP	161
Presence	SNMP	161
Media	SNMP	161
NMS	SNMP	161
RtpProxy	SNMP	161
MCU	SNMP	161
IVR	SNMP	161
Recording	SNMP	161
Tomcat	TCP	8080
FTP	TCP	21
Camera Pan	SNMP	161
Camera Tilt	SNMP	161
Camera Zoom	SNMP	161
Camera Operation Status	SNMP	161

The 'Service Properties' dialog box shows the following configuration:

- Service Name: Camera Operation Status
- Protocol: SNMP
- Port: 161
- Interval: 30000 (msec)
- Timeout: 3000 (msec)
- Retry: 3

A second 'Service Properties' dialog box shows the 'Service Condition' configuration:

- Service OID: 1.3.6.1.4.1.4855.7.51.1.3.0
- Operator: =
- Operand: 1

The bottom of the interface shows a table of 'Your Outstanding Notices (18)' with columns for Ack, ID, Send Time, Site, Device Name, IP Address, Service, and Message.

Thank you!
